PROFILE

- **Eager to learn**
- **Responsible**
- **Accurate**
- **Trustworthy**

In recent years I have been able to apply and develop these qualities in various administrative positions.

Thanks to my passion for computers, non-stop learning attitude for applications and new technologies in my position, after moving to Belgium, I decided to continue developing my talents in the IT field.

As a web developer who has finished (2020) professional training where I got practical skills in **JavaScript (React)** /**Node JS** /**MongoDB**, I am fascinated in visual Front-end part and currently polish these skills.

I am looking for a company with a combination of tasks where I can immerse in a language environment so as taking part in all stages of development

SKILLS

React JS   +Redux, hooks, GraphQl
HTML/CSS   grid system, flex-box,
UI/UX   usability, clarity
Node.js/Express   backend routing
Mongo DB   create & connect database
Rest API   get keys to fetch data
Photoshop   design, edition
Figma   project prototyping
